

On-street Workshop

TROs, Signs and Lines, and Mapping Techniques Workshop

Alpha Parking in association with **Buchanan Computing** are pleased to offer one day workshops in Traffic Orders, Signs and Lines, and Mapping Techniques:

- **Traffic Orders:** setting traffic orders in the overall context, when are they appropriate, what are they trying to achieve and what is the legal and practical basis for this process
- **Signs and Lines:** possible approaches, sign and line problems, and how they help and hinder the traffic and parking process
- **Mapping:** the practical realities and problems of recording traffic orders, and the advantages and disadvantages of map based traffic orders

The workshops will tackle the practical issues involved in the different stages of each process and how you can improve efficiency and transparency

Workshops will take place in various locations around the country with lunch and refreshments provided
